

SA2-V - ALTA 1.8Ltr Pressure Sprayer Viton Seals

Product Information

Specifications

Dimensions: (approx.)	H-305mm x L-250mm x D-125mm
Weight: (approx.)	415g
Total Capacity:	2 Litres
Working Capacity:	1.8 Litres
Colour:	Blue

Packing Information

Per Carton	9
Half Pallet	216
Full Pallet	378

Materials

Polypropylene	General purpose spraying
Polyethylene	Industrial
Plated Steel	Automotive applications
Viton	Oils & Lubricants Scale removers

Uses

Features

- A **big seller** for many applications, giving you great confidence in the product
- A **long-reach lance**, giving access to difficult areas
- A graduated body, which lets you know how much is in the sprayer
- A plated **metal rod pump**, for extra strength
- A fully adjustable nozzle, allowing you to produce a fine spray, a coarse spray or a jet spray
- Viton seals, which give the best resistancy to the widest range of chemicals

Tips

What are the best seals for pressure sprayers?

This depends on what chemicals you are spraying. Flourocarbon (trade name Viton) is the best overall resistant material to the widest range of chemicals. However, it is more expensive than other materials and may not be necessary. Nitrile (or Buna N) is lower in cost and is suitable for many water based chemicals. Ask our staff for more information about your chemicals.

What is the difference between actual capacity and working capacity?

Actual capacity is the 'total' capacity of the container. However, the pressure sprayer needs an amount of air to compress, to force the chemical out. The working capacity is the maximum amount of product which can be filled to operate the sprayer.

How can I prolong the life of my sprayer?

To get the best results from your sprayers we recommend they are completely emptied and rinsed through after each use.
