

## SA5-V - ALTA 6ltr Foam Pressure Sprayer

### Product Information

#### Specifications

<b>Dimensions (approx):</b>	H-480mm x D-180mm
<b>Total Capacity:</b>	7.05 Litres
<b>Working Capacity:</b>	6 Litres
<b>Colour:</b>	Blue, Natural & Black

#### Materials

**Polypropylene**

**Polyethylene**

Springs: **Stainless Steel**

Seals: **Viton**

#### Uses

Household

General Purpose

Industrial

Automotive Applications

Oils

Lubricants

Scale Removers

### Features

- Practical pressure sprayer with a **foam lance**
- A heavy duty sprayer, which is **re-usable** and **economical**
- Suitable for acidic and alkaline detergents with extreme pH values
- A reinforced semi-transparent container with level graduations and a 10cm-wide filler funnel, making it easy to fill
- A filter in the handle, which stops blockages within the discharge valve
- For all situations whereby the foam dissolves dirt and / or degreases
- Stainless steel springs and FPM Viton seals to give **long lasting performance**

### Tips

#### What are the best seals for pressure sprayers?

This depends on what chemicals you are spraying. Fluorocarbon (trade name Viton) is the best overall resistant material to the widest range of chemicals. However, it is more expensive than other materials and may not be necessary. Nitrile (or Buna N) is lower in cost and is suitable for many water based chemicals. Ask our staff for more information about your chemicals.

#### What is the difference between actual capacity and working capacity?

Actual capacity is the 'total' capacity of the container. However, the pressure sprayer needs an amount of air to compress, to force the chemical out. The working capacity is the maximum amount of product which can be filled to operate the sprayer.

#### How can I prolong the life of my sprayer?

To get the best results from your sprayers we recommend they are completely emptied and rinsed through after each use.
