

SP1 Small Syphon Pump - 25ltrs

Product Information

Specifications

Dimensions: (approx.)	Total Length - 530mm Suction Tube Length - 390mm Suction Tube ID - 14mm Discharge Tube Length - 540mm Discharge Tube ID - 12mm
Weight: (approx.)	67g
Output:	Approx. 6.5lpm
Colour:	Red and Natural

Packing Information

Per Carton	120
-------------------	-----

Materials

The main material is **Polyethylene**

Uses

Kerosene
Light Oils
Insecticides
Petrol
Water

Features

- Good quality, for a long life
- A **low-cost** pumping system, making it economical
- When primed, liquid will flow from a higher source for effortless delivery

Tips

How to use

The orange bulbous part is squeezed in the palm of the hand and this pumps the fluid through the pump. Once 'primed', after a few squeezes, the fluid should flow from a higher source to a lower receiver. To stop the flow, unscrew the cap at the top of the pump to let air in or simply lift the suction tube out of the fluid.
