

500ml Trigger Spray Bottle RPET 28mm Neck (LL-2029)

Product Information

Specifications

Bi-Injection:	No
Brimful / Flush Fill Volume:	555ml
Capacity / Volume:	500ml
Neck Diameter:	28mm
Neck Finish:	28/410
Neck Thread:	410
Neck Type:	Screw Neck
Colour:	Clear
Height:	212mm
Length:	57mm
Material:	rPET
Shape:	Oval
Surface Finish:	Gloss
Width:	103mm

Uses

Pet Care	Cleaning Products
Automotive Care	Bike Wash
Automotive Polish	Motocross Wash
Toiletries	Hand Sanitiser
Household Chemicals	Oils

■ Reusable ■ Recyclable

Tips

Make sure you have the right cap and bottle size

The standard Trigger Sprayers have a 28mm diameter cap with two different heights – Deep (28/410) and Shallow or Short (28/400). In the UK, the most common size for the retail market or Ready to Use (RTU) pack is the 28/410. The industrial/re-useable packs tend to have the 28/400 caps. These references correspond to the necks on the bottle so your bottle manufacturer can confirm what neck is on their bottle. If you have 400 cap on a 410 bottle neck there will be a gap under the cap. If you have a 410 cap on a 400 bottle neck, the pack will not seal on the gasket and it will leak.
